DETAILED ACTION

Remark

1. Claim 17 has been added, and claims 1-17 are pending for reconsideration.

Allowable Subject Matter

2. Claims 1-17 have been allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record to Wright fails to teach or suggest each and every feature of claim 1 as Wright fails to teach "a controller which controls a supply of power to the first amplifier circuit and the second amplifier circuit and has a first mode to supply the power to the second amplifier circuit without supplying the power to the first amplifier circuit." As pointed out by the applicant in the argument, Wright teaches of using two identical amplifiers to separate process components of a signal and the process does not constitute a feature of "a first mode to supply the power to the second amplifier circuit without supplying the power to the first amplifier circuit"; and Wright does not teach the features of claims 4 and 13 as previously indicated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2618

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Baldwin et al., Kuechler et al. and Samelis et al (PTO-892 attached) disclose systems related to amplifiers and different power control techniques.
